

2021/9/8

2021 Progress and Planning Meeting was held online

We shared information on the control and quarantine measures for COVID-19 in each country by e-mail and sought to hold a face-to-face project general meeting, but we decided that face-to-face meetings would be difficult because of strict quarantine measures in each country. Therefore, we held an online Zoom Meeting for explaining the progress and future activity plans in 2021. Especially, we discussed the budget execution this year for researcher exchange and holding meetings, along with the trends of COVID-19 infections in each country. In addition, we held a seminar on "the latest aquaculture technology in each country". The seminar presentation materials were shared by the members.
